Please read this Agreement. If You do not agree to this Agreement, You may not use this service.

a. Installation and Activation of the Gateway

You become a PicoWAN Community Member by accepting this Agreement, having a PicoWAN Account and owning a PicoWAN Gateway (or several Gateways).

Your PicoWAN Gateway is a gateway to which PicoWAN enabled Sensors can connect in order to transfer their data to the PicoWAN servers. The collected data can then be retransferred to the sensor's owners. Sensor's owner can send data to their PicoWAN enabled Sensors through PicoWAN servers too.

In order to benefit from the services and functionalities of your PicoWAN PicoPlug you will need to set-up and activate your PicoWAN Gateway and register as a PicoWAN Network Member.

The PicoWAN Gateway is also a connected plug which can be remotely accessed through the PicoWAN Android Application.

In order to be able to use the PicoWAN Gateway as a connected remotely accessible plug, You will need to connect the Gateway to your Internet connection (using WiFi or Ethernet).

PicoWAN may use information about the location of your PicoWAN Gateway (as provided by You upon registering) within the PicoWAN Network while this Agreement is in force. This is essential for other users to access the Service. You may deactivate your Gateway at any moment if you want to but you will reduce the quality and/or range of the PicoWAN Network and none of your own PicoWAN enabled Sensors can use your deactivated PicoWAN Gateway.
